

Dear Default Value,

Welcome to SOAIS Newsletter of July 2021!

SOAIS Build-Operate-Transfer (BOT) model provides clients with a flexible solution for delivery, operations, and optimization for a pre-defined period. The BOT model includes services from across the project life cycle such as design services, build services and operation services. SOAIS also delivers ongoing services that are designed to develop and grow your competence.

Case study – Chat Bots to Find Products, Check Inventory and Recommend Items

UIPATH Chat Bot was built to support customer agents to help them check inventory for a particular item or look for recommendations. A bot was built to interact with people within the company. This helped free up customer service agents' time and given below benefits:

- Faster search through data
- Making personalized recommendations

UiPath's Latest Technology Updates

UiPath integrates with Smartsheet to automate the management of workflows in Smart-sheet projects, reports, and sheets in a matter of minutes, saving hours of repetitive, manual work.
