

Dear Default Value,

Welcome to SOAIS Newsletter of June 2021!

Welcome to SOAIS Newsletter of June 2021!

Worksoft tools are intrinsically designed to identify, automate & run Enterprise Packaged applications like SAP, Workday, Salesforce, Oracle Cloud, SuccessFactors, etc. These applications receive feature changes, patches, and upgrades quite frequently. When you build a test case with Worksoft Certify, you are capturing the exact actions of a real user, key by key, field by field, system by system. That same automation can be run in production to eliminate many repetitive manual tasks - easily saving time and money.

SOAIS Blog – Test Data Management Approaches in Test Automation

For performing test automation, test data is needed and to get good test data is a great challenge. So, selecting right approach for Test Data Management is very critical. Test Data Management is the administration of the data necessary for fulfilling the needs of automated test processes. It also ensures the quality of the data and its availability at the correct time.

Worksoft Blog – Expert Panel Shares Value of Connective Automation for the Modern Enterprise

The need for speed makes businesses vulnerable to mistakes. At the Connective Automation Summit, industry tech thought leaders acknowledged the need of Connective Automation. By connecting all three stages of automation i.e., discovery, testing, and RPA, businesses can confidently accelerate enterprise transformations, reducing risk and cost along the way.
