SOAIS Blog: Integrating the Mobile with Oracle Cloud.

Mobile integration connects different apps and devices to achieve seamless data exchange and optimized workflows. For instance, with mobile integration, you can turn your smart phone into a unified communication device with voice calling, video conferencing, messaging, call routing, file sharing, and reporting capabilities.

You can also share access to contacts across both devices, enjoy Wi-Fi connectivity to untether you from the desk phone, and charge mobile devices directly from the desk phone.
