

Dear Default Value,

## Welcome to SOAIS Newsletter of October 2021!

### Continuous Testing

Stay up and running with automated, remotely executed continuous testing that's easy to implement, easy to manage and easy to deploy at scale. Enable 100 percent automated, unattended end-to-end tests at industrial scale for projects and ongoing operations to ensure every business process works, even when technology changes. Worksoft Continuous Testing Manager gives you centralized control for running remote tests on your schedule, automating everything from logging into machines to launching tests and logging off when the test is done. Schedule and Run Remote Testing to Intercept Defects and Failures Before They Impact Your Business.

### SOAIS Blog –Steps to Use the Batch Parameter in Worksoft Certify

There are many ways how a certify process can be executed. One such method is executing via batch files. Worksoft Certify provides a list of batch parameters that help the end user to execute their scripts efficiently. Read the SOAIS blog to know how to pass values to a Certify batch file from command prompt using /attribute function of batch parameter. There are scenarios where we may need to pass values during run time via a batch file. These requirements can be handled using the different parameters present in the batch file of certify script.
